

## Jr. Specialist (m/f/d) Environment & Sustainability - Shipping

**Euro Marine Logistics NV** ([www.euro-marine.eu](http://www.euro-marine.eu)) is a 100% subsidiary company of Mitsui OSK Lines who is one of the world's leading shipping companies, headquartered in Tokyo, with a fleet of more than 800 ships. From our office in Strombeek, Belgium, EML's team consisting of about 30 people, operates 5 vessels through the European waters for the automotive industry, carrying vehicles and rolling loads.

By continuously implementing our group's Sustainability Plan, we have further strengthened our contribution to improving our environment.

**'From the blue oceans, we sustain people's lives and ensure a prosperous future'**

That's our mission, be it to help shape it

### Job Summary

As Junior specialist of EML's Environment & Sustainability Team, You will support the operations, planning and customer care teams.

You will be a multitasker as you will be involved in both the customer side as well as the vessel side. After an internal training on vessel operation and planning, you will focus on contributing to reduce our environmental footprint by studying and developing the company's direction in view of alternative fuels, technical innovation, fuel efficiency and others.

And eventually you will become the window to our customers for the sustainability matters.

### Primary Duties and Responsibilities

- On the operational side
  - o you will be supporting the team and acting as back-up
- On the sustainability side
  - o Assistance in monitoring international and regional environmental legislation affecting the maritime sector.
  - o Collect and analyze greenhouse gas emissions data from various sources

- Preparation of communication material regarding environmental regulations, greenhouse gas reports and trends to internal and external stakeholders (e.g. our customers)
- Participate in cross-functional teams to ensure that environmental compliance is integrated into business decision-making
- Eventually act the window for any sustainability matters to the customers

#### Your Skills and Experiences

- Completed studies in the maritime or logistic field; ideally with focus on environment & sustainability
- Keen interest in new technologies
- Analytical, professional and service-oriented approach
- Open, communicative and team-oriented appearance
- Fluent language skills in English (word/writing)
- Routine handling of MS Office (especially Excel, PowerPoint)
- You are a driven, open & flexible person, a splendid communicator and team player
- You demonstrate sound judgment as well as apply logical/critical thought processes
- You thrive within a dynamic, quickly changing environment.
- Readiness for occasional business trips (domestic/foreign)

#### Our Offer

- A unique and challenging opportunity in a dynamic and international environment
- Concrete responsibilities within EML's Marine Team
- Training and development will be foreseen internally and encouraged
- A correct salary package with benefits such as health and group insurance and meal vouchers
- After an introductory period the option to work from home (max. 2days a week)
